

Product leader with 10+ years building B2C and B2B products across fintech, gaming, travel, and loyalty. I work best in high-ambiguity environments where the product, platform, and business model are still taking shape. My edge is high ownership: I move fluidly from strategy to architecture, UX, prototyping, and launch execution, working comfortably with junior engineers, cross-functional peers, senior stakeholders, and founders. I am most useful where the org needs both product judgment and builder energy - someone who can define the system, pressure-test the details, and help create momentum before the company is fully staffed or perfectly organized.

Built systems spanning KYC/compliance flows across 150+ countries and loyalty ecosystems serving 700M+ user profiles. Across roles, the consistent pattern has been this: start with ambiguity, build structure, create leverage, and leave behind a product or platform that is more scalable than the team started with.

OPERATING RANGE

- API-first fintech platforms
- Cards and loans journeys
- Recommendation engines and calculators
- 0-to-1 vertical launches
- KYC/compliance-aware UX
- AI-led prototyping and MVP acceleration
- Whitelabel product surfaces
- Growth, engagement, and retention systems
- Cross-functional leadership with strong IC execution

PLATFORM LEADERSHIP

CashKaro / BankKaro - Associate Director of Product (Product Lead, BankKaro)

June 2024 - Present | India

- Took BankKaro and great.cards from 0-to-1 within ~1 year, owning product strategy, platform design, UX direction, launch readiness, and ongoing iteration.
- Architected an API-first platform across credit cards, personal loans, recommendation engines, and calculator infrastructure, building for both consumer journeys and future platform leverage.
- Onboarded 19 lenders to the loans platform, including 5 API-based integrations, creating a scalable blend of direct connectivity and broader partner coverage.
- Built complex credit card API journeys with SBI and Axis, capabilities still uncommon outside the largest Indian aggregators.
- Launched great.cards, a rupee-accurate, spend-based recommendation engine with category-specific calculators designed to reduce cognitive load and make financial choices more legible for users.
- Built and operationalized AI-led whitelabel frontends to accelerate partner demos and live launches with minimal engineering dependency; shipped live work for Tide and supported active partner conversations across publishers, platforms, and creators.
- Helped shift the broader product org toward AI-assisted prototyping and MVP building, using LLMs and tools like Cursor to compress iteration cycles, improve demo readiness, and increase product throughput.

FanClash - Head of Product

July 2022 - Aug 2023 | India

- Led product and analytics across a 12-member team, establishing KPI reviews, experimentation cadence, and post-launch operating rhythm.
- Scaled DAUs from 3K to 40K+ in 6 months; grew paying users by 300%; improved MoM retention from 25% to 40%.
- Shipped a novel real-time fantasy format that increased engagement time from ~40 seconds to ~120 seconds.
- Built a B2B computer-vision scoring engine for eSports titles lacking structured scoring data.

SYSTEMS & SCALE

Western Union, Bizongo / Artwork Flow, Zolo, Loylty Rewardz, Musafir - Senior Product Manager / Product Lead

2016 - 2022

- Owned new-user conversion and KYC/compliance journeys at Western Union across 150+ countries, operating in one of the most tightly regulated product environments in consumer finance.
- Built and scaled Artwork Flow, an enterprise SaaS product, from MVP to 12+ enterprise clients; later acquired by Esko.
- Helped scale the product org at Zolo and shipped internal and consumer product lines with strong operational adoption.
- Managed 17 loyalty apps and points redemption systems at 700M+ profile scale at Loylty Rewardz.
- Led major booking-funnel and platform work across flights, hotels, visas, and holidays at Musafir.

FOUNDER / BUILDER

HotelsAroundYou.com - Co-Founder & Chief Product Officer

Jan 2013 - May 2016 | Mumbai

- Built a seed-funded last-minute hotel deals startup from scratch across mobile, web, partner integrations, and supply operations.
- Scaled hotel supply to 200+ properties across Western India while owning product, commercial problem-solving, post-sales operations, and customer experience alongside the CEO.
- Learned the foundations that still define my work: build fast, stay close to users, understand the business model, and never outsource ownership.

EDUCATION

M.A., International Relations - UC San Diego (UCSD)

B.E., Electronics Engineering - University of Mumbai
